Assignment no.5 : Assignment and practice of AI image generator Leonard AI image

Canva AI image:

Leonardo AI Images

- **Purpose:** Focused on high-quality, photorealistic or artistic images primarily for creative and design use.

- **Style:** Often supports detailed, stylized, or concept art images; popular for character designs, fantasy art, and game asset creation.

- **User Interface:** Usually offers rich customization options with multiple input prompts, style controls, and iteration features.

- **Output:** Typically high-resolution images optimized for professional use.

- **Community/Sharing:** Leonardo AI often has a community or platform where users share their creations, fostering collaboration and inspiration.

Canvas AI Images

- **Purpose:** Often designed for easy and fast creation of simple visuals, illustrations, or enhancements, sometimes integrated into content creation workflows.

- **Style:** May lean towards simpler, cleaner, or more graphic-style images suited for presentations, marketing, or social media content.

- **User Interface:** Usually straightforward and user-friendly, focusing on quick edits or generation with minimal complexity.

- **Output:** Optimized for web or digital media usage, sometimes with direct integration into digital canvases or design tools.

- **Community/Sharing:** May or may not have a strong community aspect; often integrated within platforms like Canva (if related), enabling easy sharing and collaboration.
